## VACANY

**Title:** Software Engineering

**Location:** Remote

**Job Type:** Full-Time

### Purpose of the role

We are seeking a motivated individual with a strong interest in developing websites, backend systems, or mobile applications. As we expand our global platform, your expertise will be instrumental to our success. If you are passionate about software development, performance optimization, scalability, and user experience, we invite you to join our dedicated and successful team.

### Advantageous

- Web Technologies (HTML, CSS, BootStrap, LESS etc)
- Microsoft Web Stack (MVC, C#, Razor, IIS, ASP.Net etc)
- Mobile Application Development (iOS, Mono, Android, Java etc)
- High performance/scale technologies (Caching, Load Balancing, Profiling, Indexing etc)
- Relational Databases (Microsoft SQL)

### Requirements

- 3 years' experience with C# (or similar + excellent grasp of Computer Science principles)
- University or related Computer Science Degree/Diploma
- South African citizenship

### Does this sound like you?

- Good attention to detail
- Open to and willing to give critique
- Genuinely interested in coming up with the best solution
- Constantly learning about the things they are busy with and sharing with others

**Global e-Talent**
