Job Specification: Full Stack Developer (JavaScript/Node.js)
Position Title: Full Stack Developer
Location: [Centurion]
Job Type: [Contract]
Experience Level: 6-8 years

Company Overview:
Our company is a leading IT company dedicated to delivering innovative solutions to our clients. We are looking for a skilled Full Stack Developer with extensive experience in JavaScript, Node.js, and modern web technologies to join our dynamic team.

Job Summary:
As a Full Stack Developer, you will be responsible for designing, developing, and maintaining web applications. You will work closely with cross-functional teams to deliver high-quality software solutions. Your expertise in both front-end and back-end development will be critical in driving our projects forward.

Key Responsibilities:

- Design and develop scalable web applications using JavaScript and Node.js.
- Collaborate with UI/UX designers to implement responsive and user-friendly interfaces using HTML and CSS.
- Develop and maintain RESTful APIs to facilitate communication between front-end and back-end systems.
- Utilize GitHub for version control to manage codebase effectively and collaborate with team members.
- Containerize applications using Docker to ensure consistent development and production environments.
- Conduct code reviews and provide constructive feedback to team members.
- Troubleshoot and debug applications to optimize performance and ensure reliability.
- Stay up-to-date with emerging technologies and industry trends to continuously improve development practices.
- Participate in Agile development processes, including sprint planning and retrospectives.
- Required Qualifications:
- 6-8 years of experience in full-stack development, with a strong focus on JavaScript and Node.js.
- Proficient in front-end technologies: HTML5, CSS3, and modern JavaScript frameworks (e.g., React, Angular, or Vue.js).
- Solid experience in building and consuming RESTful APIs.
- Familiarity with database technologies (e.g., MongoDB, PostgreSQL, or MySQL).
- Experience with version control systems, particularly Git and GitHub.
- Hands-on experience with Docker for containerization and deployment.
- Strong problem-solving skills and attention to detail.
- Excellent communication and collaboration skills.
- Preferred Qualifications:
- Experience with cloud platforms (e.g., AWS, Azure, or Google Cloud).
- Knowledge of CI/CD pipelines and tools.
- Familiarity with testing frameworks (e.g., Jest, Mocha, or Cypress).
- Understanding of security best practices in web development.

How to Apply:
Interested candidates are invited to submit their resume and a cover letter outlining their relevant experience to recruitment@oms.africa or lindiwes@oms.africa Please include examples of previous projects or a portfolio showcasing your work.
